

Sharma . That's just my opinion. For more info, please read and choose from the following link: Dissenting views are abhorrent. The Court struggles every day to see a coherent line through the muddle of competing interests. Dissent can be gratifying, or disastrous, depending on whether it is rooted in a misreading of the law or a lack of respect for the man or woman trying to administer that law. Here's a particularly heinous example of the latter from the other day: To my mind, the creation of an outlet that's more popular than the mainstream by definition ensures its survival. Big Bang has more power to influence Congress than anyone else because it speaks directly to people's sense of what's important to them. This power, of course, is a double-edged sword. If you can persuade 30 percent of the public to pay for this network while another 70 percent opt out, you're going to get a lot of money and a lot of influence. But it's a principle I believe in. This is evidence of two things: the First Amendment requires the protection of all viewpoints, even if I disagree with them; and Ms. Kahle is not the best judge of what the First Amendment requires. Ms. Kahle might actually believe that people who watch cable television are so naïve, or so unreflective, or so uncurious, that they don't really know anything about the other things that appear on the tube. She can't be expected to know that this is a foolish view; she's a lawyer, not a philosopher. NYC streets still hot for peds even in hail HEAT and rain didn't dampen today's ped biking in parts of New York City. Several reports came in of on-street riding taking place under conditions that appeared to be similar to those reported earlier this week. Web sites like www.streetfilms.com showed crowds of pedestrians and bicycles riding between the rain showers in Queens, Staten Island and Brooklyn. The effects of the rain were noticeable, with the tracks of several bikes showing visible deformation from the weight of the riders. The MTA made a point to update its Twitter feeds when conditions were wet during rush

2nd Edition (Hardcover). By Sharma HL, Sharma KK ISBN: 9788181914644 9781819146448 The book inspires the learning of pharmacology concepts for rational drug therapy, nurturing values of rational pharmacotherapeutics for generations to come. 14 January 2020 - Buy Principles Of Pharmacology By Hl Sharma And Kk Sharma Videos - Buy Principles Of Pharmacology By Hl Sharma And Kk Sharma Category:Indian pharmacologists Category:1936 births Category:Living peopleA 15-year-old first-grader, kidnapped in broad daylight in 1983 from the high-school playground, hanged himself in his mother's Bronx apartment Sunday, a family member said. The relative, who asked not to be identified because the family had not yet been notified of the boy's death, said Sunday that the boy, Marvin Bracewell, died early that morning of a self-inflicted gunshot wound to the head. He had been found dead at 1:42 a.m., said a police spokesman, who declined to give more details. Police were called to the apartment of Eva Bracewell on White Plains Road, near Black Rock, after a neighbor reported a foul smell. The dead boy was found lying on a mattress on the floor in the back bedroom, the relative said. The parents discovered him when they arrived home Sunday morning from a trip. Validity of the Iranian version of the Abnormal Involuntary Movement Scale (AIMS). The Abnormal Involuntary Movement Scale (AIMS) is used in the diagnostic process and treatment of patients with movement disorders. The present study aimed to translate the AIMS from English into Farsi, and to evaluate its psychometric properties in a sample of patients with Parkinson's disease (PD) and multiple system atrophy (MSA). The original version of AIMS and the related measures were translated into Farsi. A total of 60 participants with a diagnosis of PD (n=20) or MSA (n=40) were recruited. Face and content validity of the translated tool were confirmed. Factorial validity and construct validity of the translated instrument were assessed with confirmatory factor analysis (CFA). Internal consistency of the translated tool was assessed by Cronbach's alpha. Test-retest reliability was calculated using intraclass correlation coefficient (ICC). CFA revealed an acceptable model fit, and f678ea9f9e
